**Monday, October 6<sup>th</sup>, 2025**

Dear Valued Customer,

As we shared in our July 2025 ERP announcement, Atkins & Pearce has begun the process of transitioning to a new enterprise system that will improve efficiency and better support our interactions with your business. As part of this project, we are making updates to how certain product item numbers are maintained in our system.

Our records indicate you have an open order or have purchased products under an Alta Technologies item number (beginning with "9") since January 1, 2024. As background, A&P acquired Alta Technologies in 2015, and since then we've continued supporting the Alta item numbers (beginning with '9') to ensure consistency for our customers. With our ERP transition, these numbers will soon begin shifting to A&P equivalents. We want to make you aware of the following updates:

- **Alta Technologies item numbers remain active through 2025** – This means you can continue to order under the Alta item numbers in the short term, while gradually transitioning your systems to the A&P equivalents over the next couple of months.
- **Cross-Reference Note in place** – Beginning with our ERP launch, each Alta item number will have an updated description reflective of the corresponding A&P branded item family (Monoflex®, Suflex®, or Flex-Tuff®). These items will also include a note in the description indicating they are formerly Alta Technologies' items.
- **We encourage system updates** – Our Customer Facing Group can now provide you with the equivalent A&P item number and description upon order entry for orders including the Alta item series. We recommend updating your internal systems as soon as possible to prepare for the future deactivation of the Alta item numbers in 2026.

For your convenience, a cross-reference chart providing the Alta Technologies item families and item number nomenclature, alongside their A&P equivalents is attached. This cross-reference chart is also [available online here](#) for easy reference.

We are committed to making this transition as smooth as possible and will continue to provide any updates along the way. If you have any questions, please don't hesitate to reply to this email or reach out directly to a member of our Customer Facing Group:
